Wisenet SSM

Ideal choice for integrated monitoring

Wisenet SSM (Smart Security Manager) is a video monitoring software that maximises the operational efficiency of Hanwha Vision products (Network camera, Encoder, DVR and NVR). It provides seamless system integration and central monitoring.

Cost Competitiveness

Impressive features that are cost-effective

One-time licensing cost (No cost for upgrades and maintenance)

High quality VMS features

High reliability

Superb device compatibility offered as a VMS of device manufacturer

Integrated operation of H/W and S/W for efficient maintenance and management

Dashboard that can monitor device status

Convenient Operation

A single manufacturer providing unified user experience

Leverage features to improve operations

Highly versatile for different environments

AI video search

Connect Hanwha Vision AI cameras to SSM.

Best Shot search

System operators can utilise SSM's AI video search feature to easily search specific events in the video by designating distinctive attributes of objects such as faces and vehicles. If a user searches specific attributes such as "red motorcycle" or "man wearing shorts", the best still cuts of the classified objects in the video will be retrieved. BestShot can be used as forensic data for accident investigations, playing back video that includes the images.

Hanwha Vision SSM search

Support quick search using attributes

BestShot

Object detection & classification (Person, face, vehicle, licence plate)

Stable monitoring

SSM provides safe and stable monitoring environment through Failover.

Vehicle management & event search

Failover priority (High, medium, never) can be configured for each channel. If a camera is failed, high priority cameras will be failed over at first. Users can record and save important footage without loss of data.
